

Modular, compact and flexible top loading casepacking designed for medium productions using a Pick and Place system that allows multiple case filling stations at the same time.

Our in-house picking head design can be adapted to pick multiple types of pouches allowing it to work from single to quadruple picking heads

An accessible and user-friendly design that gives access all around the machine for easier and efficient maintenance.

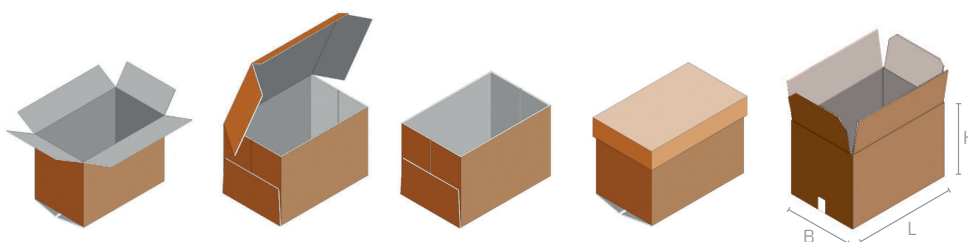

Features

- ✘ Production between 25 and 30 cartons/minute
- ✘ Case packing up to 4 cases/cycle
- ✘ Optional Independent case erecting unit
- ✘ Case sealing by tape or hot melt glue
- ✘ Optional turning head or side extension picking head
- ✘ Pick & Place D-100 up to 18 nominal cycles
- ✘ 1 product entry
- ✘ Rotating head up to triple system
- ✘ Fix head up to quadruple system

Benefits

- ✘ Ergonomic design
- ✘ Reduced footprint: 4,3x2,3 m
- ✘ Easy access for maintenance
- ✘ Versatile machine easy to adapt to different formats
