

Our top-loaded casepacking for chain-pack solution.

Its design allows a great range of chain-pack lengths making it a flexible and versatile solution to perform several types of folding.

The uniqueness of this solution is to perform the folding directly inside the box instead of traditional systems that fold outside the box.

Our inhouse picking head design allow us to adapt it to product requirements. It can work from double to triple suction cup holders.

An accessible and user-friendly design that gives acces all around the machine for easier and efficient maintenance.

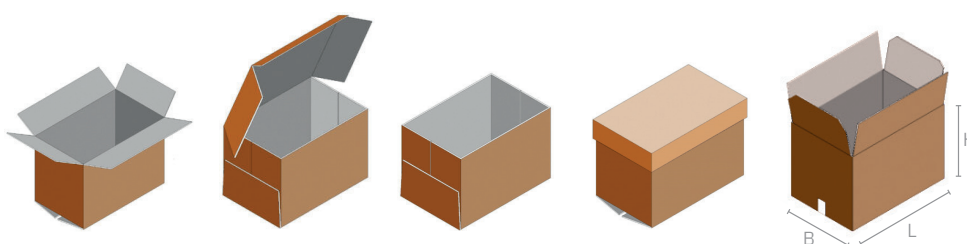

Features

- ✘ Production up to 10 cycles/minute
- ✘ Flexibility of chain pack bending inside the box
- ✘ Adaptable to variable lengths of chain packs

Benefits

- ✘ Ergonomic design
- ✘ Reduced footprint: 4,3x2,3 m
- ✘ Easy access for maintenance
- ✘ Versatile machine easy to adapt to different formats
- ✘ HMI (Human-Machine Interface) screen with complete and intuitive software

Box types

	L	B	H
Max	600	500	400
Min	350	320	150
