

Modular, compact and flexible, the Prodec FL side-load casepacking machine is designed for mid-speed productions.

An accessible and user-friendly mono-block design, designed for product grouping and collating, case forming, -filling and -closing in a single unit with small footprint.

The FL casepacker is equipped with a unique case opening system that ensures correct case positioning of the case at the loading station and its smooth transfer to the closing station.

Features

Main features 2 stations (FL-1 and FL-5)

- ✘ 2 stations: one for forming/filling and the other for carton closing
- ✘ From 6 to 8 cartons/minute
- ✘ Reduced space and easy handling for the operator

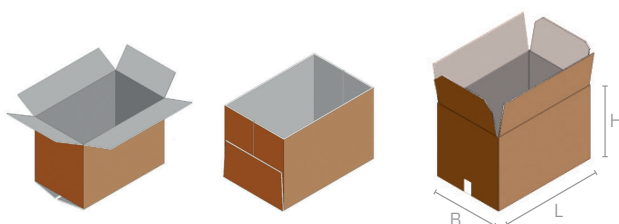

Main features 3 stations (FL-3 and FL-6)

- ✘ 3 stations: forming, filling and case closing.
- ✘ 15 cases/minute
- ✘ Reduced space and easy handling for the operator

Benefits

- ✘ Ergonomic and compact design
- ✘ Easy access for maintenance
- ✘ Versatile machine easy to adapt to different formats
- ✘ HMI (Human-Machine Interface) screen with complete and intuitive software
